

# Zoom Skill

This skill allows the authenticated user to perform simple tasks on his/her Zoom account directly from the VertexGraph chat prompt.

## API Permissions Setup

1. Go to <https://marketplace.zoom.us>
2. Login with your Zoom account credentials.
3. Go to **Develop > Build App**.

4. After the app finishes creating, navigate to **Basic Information**. Select **User-managed** and copy down your **ClientID** and **ClientSecret**. In **OAuth Information**, add this link <https://api.vertexgraph.com/adminapi/assets/oauthcode> to the **OAuth RedirectURL**. Then add the following links into OAuth Allow Lists:

<https://api.vertexgraph.com/adminapi/assets/oauthcode>

<http://localhost/zoom/auth> (only apply to local setup, public url is different)

<http://localhost/zoom/token> (only apply to local setup, public url is different)

Select how the app is managed

This may affect Features, Scopes, and permissions to add the app.

☐ Admin-managed

Account admins can add and manage this app. It can access and manage users' data depending on the scope selection.

☒ User-managed

Individual users can add and manage this app. The app only has access to authorized users' data.

OAuth Information

Development

OAuth Redirect URL

Provide the development redirect URL to generate an authorization URL for development testing.

https://api.vertexgraph.com/adminapi/assets/oauthcode

☐ Use Strict Mode for Redirect URLs

This option only allows the redirections that exactly match the valid OAuth redirect URLs.

☐ Subdomain Check

This is for security check that can prohibit others from tampering with the redirected URLs. This option only allows the redirections that exactly match the subdomain of the valid OAuth redirect URLs.

OAuth Allow Lists

5. Navigate to **Scope** and add all necessary permissions in the application (*user:read:user, meeting:read:list\_meetings, meeting:write:meeting, meeting:update:meeting, meeting:delete:meeting, cloud\_recording:read:list\_recording\_files*). Then click **Continue** to be ready for using.

## Test Prompts

Please refer to the root README (<https://github.com/vertexgraphinc/aiskills/blob/main/DotNet/README.md>) for instructions on how to host the custom skill and install it on the VertexGraph.ai website. Once the Zoom Skill is properly installed, you can try the following example prompts on the AI Assistant:

- Get my upcoming Zoom meetings
- Create a meeting in zoom at 5 pm with example@example.com and example2@example.com
- Update my upcoming Zoom meeting to 8pm the next day
- Remove my Zoom meetings from today till the end of the week
- Get all my Zoom recordings
