

Slack Skill

Creating Slack App:

1. Go to <https://api.slack.com/apps>
2. Click on Create New app

3. Select "From Scratch"

4. For App Name type "Slack AI Skill" and then select which workspace you would like to install it to.
5. Once that is done, navigate to the OAuth & Permissions Tab on the left side bar.

OAuth & Permissions

Advanced token security via token rotation

Recommended for developers building on or for security-minded organizations – opting into token rotation allows app tokens to automatically expire after they're issued within your app code. [View documentation.](#)

Opt In

OAuth Tokens for Your Workspace

These tokens were automatically generated when you installed the app to your team. You can use these to authenticate your app. [Learn more.](#)

User OAuth Token

Copy

Access Level: Workspace

Reinstall to Workspace

6. Scroll down to Redirect URL section and add the following URL's.

<https://api.vertexgraph.com/adminapi/assets/oauthcode>

<https://localhost/slack/oauth/auth>

<https://localhost/slack/oauth/token>

Redirect URLs

You will need to configure redirect URLs in order to automatically generate the Add to Slack button or to distribute your app. If you pass a URL in an OAuth request, it must (partially) match one of the URLs you enter here. [Learn more.](#)

Redirect URLs

https://api.vertexgraph.com/adminapi/assets/oauthcode

https://localhost/slack/oauth/auth

https://localhost/slack/oauth/token

Add New Redirect URL

Save URLs

7. Once that is done, navigate to the Basic Information Tab on the left side bar.
