Slack Skill

Creating Slack App:

1. Go to https://api.slack.com/apps
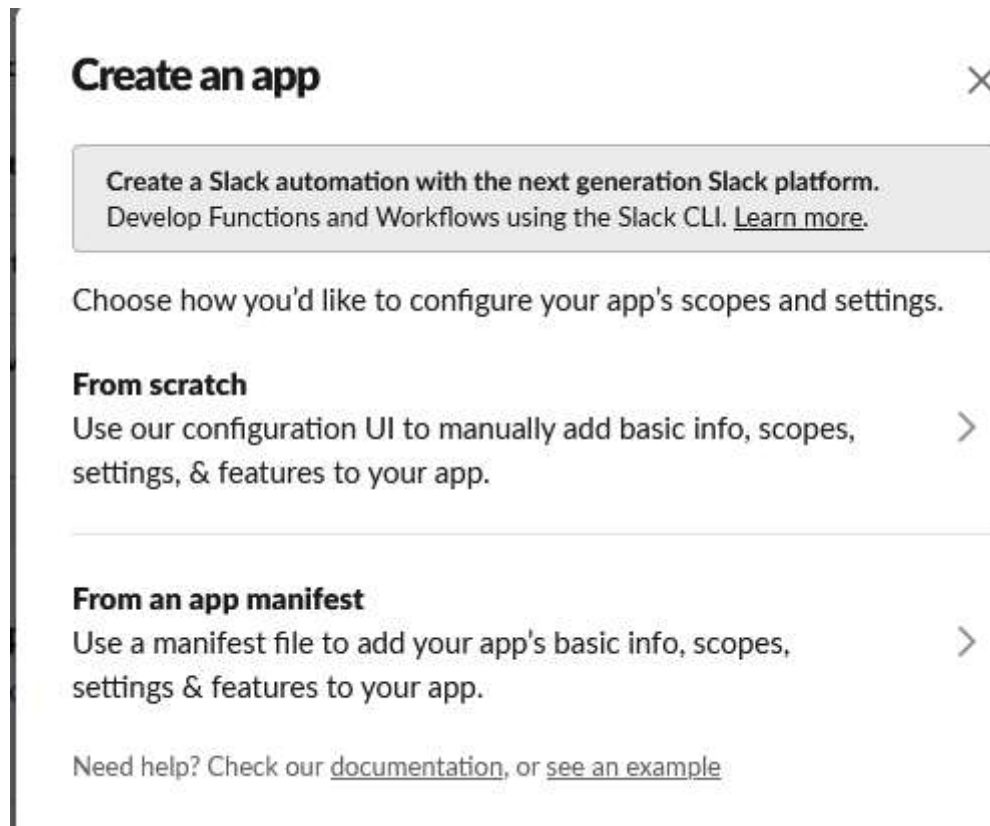

2. Click on Create New app

3. Select "From Scratch"

4. For App Name type "Slack AI Skill" and then select which workspace you would like to install it to.

5. Once that is done, navigate to the OAuth & Permissions Tab on the left side bar.

6. Scroll down to Redirect URL section and add the following URL's.

https://api.vertexgraph.com/adminapi/assets/oauthcode

https://localhost/slack/oauth/auth

https://localhost/slack/oauth/token

Redirect URLs

You will need to configure redirect URLs in order to automatically generate the Add to Slack button or to distribute your app. If you pass a URL in an OAuth request, it must (partially) match one of the URLs you enter here. Learn more.

Redirect URLs

https://api.vertexgraph.com/adminapi/assets/oauthcode

https://localhost/slack/oauth/auth

https://localhost/slack/oauth/token

Add New Redirect URL

Save URLs

7. Once that is done, navigate to the Basic Information Tab on the left side bar.

Building Apps for Slack

Create an app that's just for your workspace (or build one that can be used by any workspace) by following the steps below.

Add features and functionality   ⊘ ▸

**Install your app**   ⊘ ▸

Manage distribution   ▸

8. Scroll down and you will see your App Credentials, you want to copy your **Client ID** and **Client Secret**

Setting up Skill in VertexGraph

1. Navigate to https://vertexgraph.ai/portal/
2. On the left side tool bar select the second option "AI"
3. Now select the custom skills icon on the top right corner

1. Once on the skills section Press "New Custom Skill"
2. Follow the setup until you reach the section where you must enter the OAuth Client ID and Secret
3. Copy and paste the client ID and secret from the Slack AI Skill information
4. Get the authorization code and authorize VertexGraph to access your slack account
5. Once completed assign the new skill to any of your assistants to start using it
